WHAT DRIVES US

OUR MISSION

We are dedicated to helping student athletes achieve their goals both in and out of the pool. Every participant is given the individual focus needed to develop faster while giving them the best opportunity possible to be recruited. We aim to provide an experience that develops personal growth, athletic ability, character development, and an overall well rounded person while maximizing their abilities and opportunities.

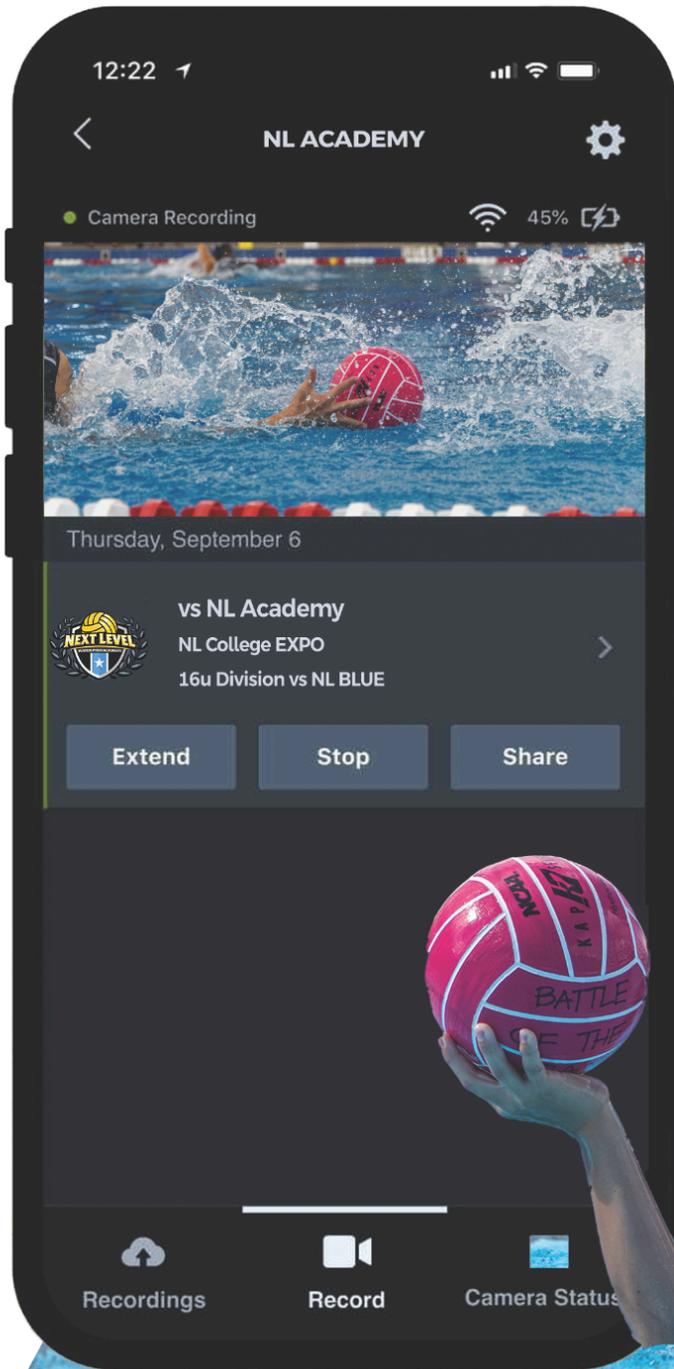

OUR VISION

We strive to make an impact on individuals so that they may positively impact their respective communities. Our Academy takes pride in excellence for all aspects of what we do. Training, Coaching, Support, and impact on everyone we work with. Our goal is to produce impactful individuals and nurture raw talent.

OUR VALUES

Confidence is built from preparation. Our organization designed to put you as both an individual and a team player. Team before Self. We believe that through hard-work, discipline, and a relentless hunger to improve, all Academy athletes are molded to become the best version of themselves. We strive to instill these values in each athlete we work with.

COLLEGE RECRUITING

Our Academy is designed to connect you with college coaches directly through our Athlete Recruiting Profiles. Through our program, each athlete will receive access to recruiting profiles, collecting content catered directly to them. Our AI Tracking camera systems are able to hone in on each individual simultaneously throughout the stream. Our team then connects this content into each athlete's profile, and gives access to all College Coaches within our Network to increase recruiting opportunities for Athletes looking to compete at the Next Level.

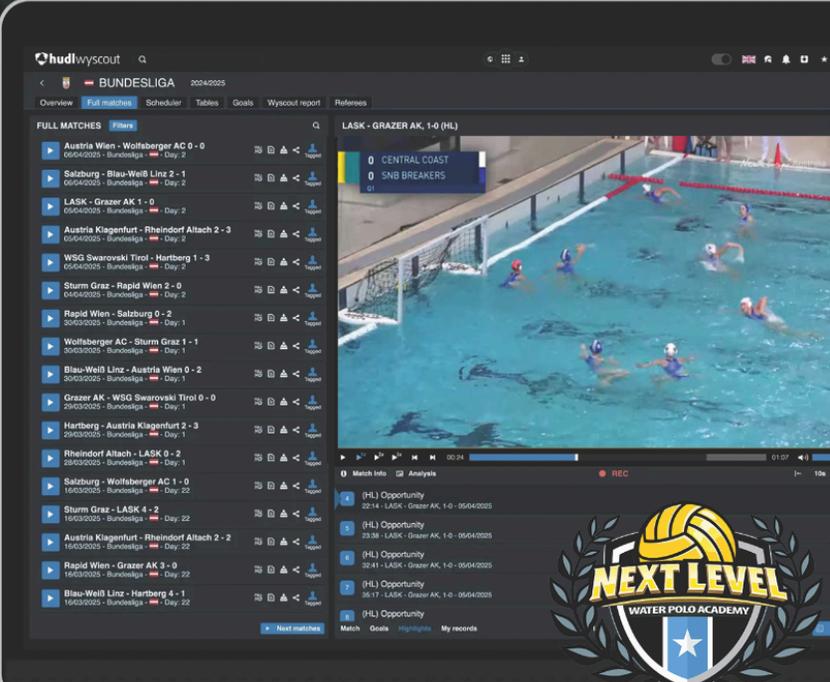

WHAT WE DO

Redefining Recruiting.

NL Academy helps athletes reach their potential while getting noticed! We're redefining how athletes are found by creating a library of content, video, and data to help showcase your athlete's best moments- & Our Focus Cameras don't miss a moment! These automatically capture all the action start to finish via AI Tracking, allowing athletes to learn from each possession and capitalize on every goal!

Every play. Every game.

Our Academy films, organizes, analyses, & edits, & distributes film dedicated to each athlete, and creates a full Recruiting Package, complete with stats, video, & analytics easily tracked for every player.
